Frontend Developer Summary

- I'm a frontend developer with 2+ years of experience. I'm particularly strong with React, Next.js, and TypeScript, but I am comfortable working in many stacks.

Work Experience

Frontend Developer FREELANCE

June 2024 - Present

- Developing a headless e-commerce platform using React, Next.js, Node.js, TailwindCSS, and Shopify, focusing on creating a seamless user experience with a modern tech stack.
- Collaborating with stakeholders to define project requirements and implementing responsive design principles to optimize the platform for all devices.
- Integrating Shopify's API for dynamic content management and scalable e-commerce functionalities.

Frontend Developer SOLENIUM

October 2023 - June 2024

- Revamped the entire landing page using Vue, TypeScript, and Nuxt.js, leading to a 331.6% increase in organic traffic and a significant SEO improvement within the first quarter.
- Initiated and led the development of an energy border meter monitoring app with Vue, TypeScript, and Nuxt.js, projected to reduce manual monitoring time by 90%.
- Collaborated with cross-functional teams, including product and design, to align technical implementation with business goals, enhancing the overall user experience.

Frontend Developer HOOLOLI

October 2022 - December 2023

- Spearheaded the end-to-end development of a data management web app, independently selecting the tech stack (React, TypeScript, Tailwind CSS) and managing trade-offs to meet project goals.
- Delivered a user-friendly interface that supported the data input and visualization needs of plantation managers, resulting in the successful onboarding of the first real user.

Part-time Code Reviewer MICROVERSE

October 2022 - October 2023

- Conducted over 120 code reviews and PR contributions, significantly improving code quality and fostering best practices among a global, cross-cultural team of junior developers in a fully remote environment.
- Mentored junior developers from diverse backgrounds, helping them overcome technical challenges and improving their coding proficiency, which led to a 30% reduction in common errors in their submitted projects.

Education

Remote Full Stack Web Development Program MICROVERSE (Remote, San Francisco, CA)

March 2022 - October 2022

- Completed 1300+ hours of intensive training in algorithms, data structures, and full-stack development with a focus on JavaScript, React, Redux, Ruby, and Rails.
- Developed and deployed 10+ full-stack projects, collaborating remotely with peers from 5+ countries to simulate real-world team environments.
- Mastered remote collaboration techniques, including pair programming, GitHub workflows, and daily standups, working effectively in a cross-cultural, international team.

Bachelor of Mechanical Engineering (Unfinished) National University of Colombia

January 2019 - February 2022

- Developed strong analytical and problem-solving skills through engineering projects, eventually realizing that my true passion lay in software engineering, prompting me to pursue a career in web development.
